FEATURES / ADVANTAGES

- Hitech Look and Latest Technology
- Large column free Span (160')
- Minimum Number of columns required, 40% Saving in Civil Cost
- 3D Truss, Highly Rigid and Strong
- Rust free Powder Coated structure
- Superior in Aesthetics
- Pre-Engineered and Pre-fab Roof
- Fully Removable and Reusable

SPACEFRAME

Space frames are three dimensional Tubular Truss with Ball Joints that span in more than one direction. In addition to providing great rigidity and inherent redundancy, space frames can span large areas economically, providing exceptional flexibility of usage within the structure by eliminating interior columns. Space frames possess a versatility of shape and form. They can utilize a standard module to generate flat grids, barrel vaults, domes, and free-form shapes.

DESIGN

- STADD III-Computer Design
- Various Load Cases (Wind Load, Dead Load, Live Load, Thermal Load)
- According to IS Standards
